NEWSLETTER Nº 5

July 2019

Dear subscriber of Baqua project:

We are very happy to keep you informed of the developments of our project and future activities.

Currently, the third generation is in progress:

- The third generation of combed fibre and pulp were delivered.
- Housing devices reinforced with combed fibre were injected.
- The second generation of the banana sleeves were tested and fish feed bags tests are in progress. The combed fibre was micronized and third generation will be produced in the following months.
- The third generation of fish diets was developed with polyphenols of the “florilla” and they are being tested in seabass and tilapias.

Further information about our progress in following newsletters. See you!
